

# GOOGLE SHEETS VS EXCEL

## GOOGLE SHEETS

## MICROSOFT EXCEL

Pricing

Free

Not Free

Collaboration

Simultaneous file editing

No Simultaneous editing

VBA / Apps Script

Apps script is not bad

VBA is powerful

Data Analysis

Not a good idea

Does the job pretty well

Cross Device Usability

Access from all devices

Mainly for desktop usage

Version Control

Automatically recorded

Should do it on your own.

## Final Thoughts

Google Sheets vs Excel! These are the most common spreadsheets used all over the world by billions of people.

Google Sheets has done a good job to compete with Excel, the King of Spreadsheets.

Now both has pros and cons.

The choice is yours!
